

SAMPLE TEX NOTE

TEX-SITE

ABSTRACT. A small note used to verify that the default tex-site workflow renders PDF, HTML, and index entries.

1. A FIRST CALCULATION

This file is intentionally small. It gives a fresh copy of the repository a publishable note immediately, and it exercises the same build path used by downstream sites.

Theorem 1. *For every integer n , the number $n^2 - n$ is even.*

Proof. We have $n^2 - n = n(n - 1)$, the product of two consecutive integers. One of those integers is even. $\square$
